

**"THANK YOU  
for voting our  
dental practice Tops  
year after year!"**

Steven Branberg, DDS  
PROSTHODONTIST

We have all been wearing face masks for months now and it's impossible not to smell your own breath. Whether you admit it or not, most of us have experienced that stinky smell under our protective masks. And bad breath isn't the only dental issue our masks have been covering up! If you avoid smiling because you're embarrassed by your teeth, if you have difficulty chewing and eating all the foods that you love, or if your speech is unclear, the DFW Dental Implant Center is here to help.

## Get Your Smile Ready FOR WHEN YOU TAKE OFF THAT MASK

### Improve your *Smile* Improve your *Bite* Improve Your *Life*

The DFW Dental Implant Center office is truly unique because unlike most dental implant centers that only focus on implant dentistry, they realize that not every person needs a dental implant or a full set of replacement teeth. For this reason, they offer all aspects of cosmetic dentistry, general dentistry and removable prostheses. Dr. Steven Branberg also knows that dental emergencies can happen at any time. To accommodate these untimely events, he offers same day limited exams, emergency tooth extractions and in some cases, they can even place a dental implant with a fixed temporary tooth within 24 hours. His office also stresses the importance of routine follow-up visits after any dental treatment is finished. This is the most important factor in preventing future cavities and gum disease. Their gentle dental hygienist will clean your teeth and take digital x-rays to help you to always maintain a healthy mouth.

**ONE TEAM ALL IN ONE LOCATION** Traditionally, dental implants require patients to travel to different locations to be treated by multiple specialties. The oral surgeon will place the dental implant, a lab technician will make the restoration and a restorative dentist will place the crown. This often increases the cost and time of treatment. Dr. Branberg believes there is a better way to perform implant dentistry. The DFW Dental Implant Center is unique in that their focus is to provide their patients with quality dentistry by their dedicated team of experts all in one location. This new approach has allowed thousands of patients to receive a better smile and a healthier mouth without the inconvenience of having to travel to various dental offices for their care. This makes the process not only more convenient but also less expensive and quicker to complete—it's a simpler approach to implant dentistry.

**ONE-ON-ONE DENTAL CARE** Unlike most dental practices that schedule multiple patients at the same time, Dr. Branberg's office only schedules one patient at a time to minimize patient wait times. They know everyone is busy so they make every effort to get you in and get you out in a timely manner.

**SPECIALIZED TRAINING IN PROSTHODONTICS** Prosthodontics is a specialty field within dentistry that focuses on both repairing and replacing teeth in the most lifelike way possible. Dentists with this kind of expert knowledge are typically thought of as the "quarterback" when dental teams handle more complicated cases. Dr. Branberg has trained extensively in prosthodontics and strives to provide truly world-class care. No matter what your smile needs to look and feel its best, you can trust that he's spent countless hours perfecting it!

**FREE CONSULTATION** Every dental implant procedure begins with a free, no obligation consultation. At this visit, Dr. Branberg will create one or two unique treatment plans just for you. You will learn about the implant process and why patients choose his office for their dental care. You also receive a plan with exactly how much the treatment will cost so you won't worry about surprise fees.

**DENTAL INSURANCE ACCEPTED AND THIRD-PARTY FINANCING AVAILABLE** DFW Dental Implant Center works with CareCredit to offer third-party financing, as well as also accepting all PPO dental insurance plans. They even file the claims on your behalf. For those patients without dental insurance, they accept cash, checks, debit cards and all major credit cards. They understand how important it is to be able to restore your dental health and self-confidence with a long-term solution.
