

Combining Art + Science to Create Beautiful Smiles

Prosthodontist Steven Branberg, DDS

Specialty | With other dentists, if a patient needs help with multiple missing or decayed teeth, they usually have to bounce between different dental offices to get everything they need. With The DFW Dental Implant Center, however, even the most complicated dental cases can all be handled in just one convenient location. Dr. Steven Branberg is a general dentist and prosthodontic expert, meaning he has extensive knowledge and experience repairing and replacing teeth using the most advanced techniques and materials available today. He's able to perform the entire dental implant procedure from start to finish. His goal for every patient is for them to have a smile that looks great, feels even better, and can be trusted to last a lifetime. After Dr. Branberg rehabs someone's smile, he and the rest of his team are also able to provide ongoing preventive care to ensure their patients enjoy optimal oral health for decades to come.

Why Choose a Prosthodontist | Patients choose a Prosthodontist because of their advanced education and training, efficiency, and expertise with advanced technology. Prosthodontists are extensively trained in state-of-the-art techniques and procedures for treating complex dental conditions and restoring optimum function and esthetics. The term "protho" actually means replacement and "dontist" means dealing with teeth. Essentially, Prosthodontists are the recognized experts when anything needs to be replaced in your mouth. This can range from a single tooth, multiple teeth, or all teeth and gums in the mouth. While many other dentists can do some of these treatments, Prosthodontists are the specialists dedicated to this type of care, and why so many trust their expertise.

What Clients Can Expect | Unlike dentures or dental bridges, getting dental implants is a multi-step process that spans the course of several months. While this may seem like quite a while, it's this thorough and unique placement that ensures the results are comfortable and long-lasting. In fact, dental implants have the potential to last a lifetime! During your consultation, Dr. Branberg will walk you through your entire treatment plan step-by-step.

What Sets Us Apart | What sets Dr. Branberg apart from other dentists and prosthodontists is that he completes every stage of the dental implant treat-

ment himself—including both the surgical placement and the restoration. He's also given numerous presentations to general dentists on various aspects of prosthodontics, including lectures titled A Systematic Approach to Complete Dentures, Removable Partial Dentures for the General Practitioner, and Implant and Tooth-borne Full-Mouth Reconstructions. He believes that sharing his knowledge and experience with other dental colleagues only helps to improve every patient's results!

Dental Implant Difference | The reason dental implants are so special is that they are the only restoration that brings back an entire tooth both above and below the gumline. Compared to traditional tooth replacements, dental implants provide a stable foundation by replacing the missing roots and fusing directly to the jawbone. With dental implants, your replacement teeth are bonded securely, so you can enjoy a truly lifelike smile. This is why dental implants have become the gold standard in the dentistry field for missing or failing teeth.

Improving Lives | Dr. Branberg (also known as "Dr. B") started practicing here in Texas in 2011, and he's proud to be a dedicated Colleyville dentist and prosthodontist—helping countless patients achieve incredible smile transformations. He not only improves their dental health, but also helps them feel more outgoing and confident in their everyday life.

You Should Know | Thanks to his prosthodontic training, Dr. Branberg knows a thing or two about replacing missing teeth, having rebuilt countless smiles over the course of his career. Whenever someone comes to see him wanting to replace their missing teeth, his first recommendation is always dental implants. Why? Because they offer the best of everything in a single treatment—unmatched aesthetics, supreme functionality, and sturdy construction that can last for decades. When you are ready to enjoy a full and confident smile again, dental implants are your best answer—and you can get them at The DFW Dental Implant Center in Colleyville. Is your smile in need of some serious help? If so, Dr. Steven Branberg is ready to provide everything you need at the highest possible level.
